The Department of Physics at Arizona State University (ASU) seeks applications for a tenure-track assistant/associate professorship in experimental biological physics or nano-biophysics. The position will include a joint appointment with the Biodesign Institute, and candidates must demonstrate a strong overlap with biological sciences and expertise in medical or disease-related research. Applicants must have a PhD in physics, biophysics or a closely related field at the time of appointment, a validated record of research accomplishments with clear potential to establish a vigorous, externally funded, research program, and show a strong commitment to excellence in teaching. Demonstrated experience in a collaborative, multidisciplinary environment and excellent verbal/written English skills are desired. Exceptional applicants may be considered for a more senior appointment.

Complete applications will include a cover letter, curriculum vitae, statement of research and teaching plans, and contact information for three references (postal, email, and phone). Materials should be submitted electronically to: physics.search@asu.edu

Applications will be considered beginning October 22, 2012, with further review of completed files every two weeks until the search is closed. A background check is required for employment. The appointment will begin August 2013.

Arizona State University is an affirmative action, equal opportunity employer committed to excellence through diversity. Women and minorities are strongly encouraged to apply.
