

One postdoctoral position in Condensed Matter Theory is available at the Department of Physics, Applied Physics, and Astronomy, Binghamton University – SUNY in Prof. Wei-Cheng Lee's group. Our research interest is in understanding physical properties emerging from electron correlations. Candidates with experiences of numerical calculations using many-body techniques will be highly preferred. Information about our group can be found in <http://bingweb.binghamton.edu/~wlee/>

Candidates should submit via email their applications, including CV, contact information of two references, and statement of research interests in a single PDF file, to wlee@binghamton.edu. The reviewing process will start immediately until this position is filled.

We also have several openings for PhD students. If interested, please check <http://www.binghamton.edu/physics/programs/graduate.html> for further information.
