

Faculty Position in Condensed Matter Physics

The Department of Physics at Emory University invites applications for a tenure-track faculty position at the assistant professor level in experimental or theoretical Condensed Matter Physics, to begin in September 2014. This is one of multiple positions planned as part of the strategic expansion of Materials Physics research at Emory University. We are particularly interested in applicants who will benefit from and complement the existing strengths in nanoscience, photonics, spintronics, energy materials, statistical, nonlinear, and computational condensed matter physics. For a detailed description of ongoing departmental research, see <http://www.physics.emory.edu/research.html>.

Applicants must have a PhD in physics or a closely related field, and a proven record of research accomplishment. The successful candidate will be expected to establish an independent, internationally recognized and externally funded research program, and demonstrate excellence in teaching at both undergraduate and graduate levels. The successful applicant will have access to the state-of-the-art materials research and nanofabrication facilities maintained by the Department of Physics and other research support centers at Emory, as described at <http://www.physics.emory.edu/Facilities/>.

To apply, submit a Curriculum Vitae, a research plan, and a teaching statement to search2013@physics.emory.edu. Applicants should arrange for at least three letters of recommendation to be sent to the same address. Review of applications will begin November 1, 2013 and will continue until the position is filled. Emory University is an Affirmative Action/Equal Opportunity employer. Women and members of underrepresented groups are particularly encouraged to apply.
