

Stipend for a PhD in condensed matter theory at Free University Berlin, starting as soon as possible. The research will be about strongly correlated electron systems, quantum magnetism and spin liquids. The PhD project also includes a collaboration with experimental groups at Helmholtz Center Berlin for Materials and Energy. Profound expertise in condensed matter theory is required. Applicants must hold a MSc or equivalent diploma.

An official announcement will soon appear on the homepage of the Helmholtz Center. Candidates with interests and experience in condensed matter theory are encouraged to contact me for further information (email: johannes.reuther@fu-berlin.de).

Thank you and best regards,
Johannes Reuther
