ICMT Postdoctoral Fellowship,
Departmental Postdoctoral Positions
at the University of Illinois at Urbana-Champaign

Applications are invited to fill several postdoctoral positions in condensed matter theory at the University of Illinois at Urbana-Champaign. These positions start August 16, 2013. They will normally be expected to last for two or three years, and are associated with the Institute for Condensed Matter Theory at Illinois.

Postdoctoral Fellows at ICMT will have wide latitude in their choice of research activities, and will be encouraged to be broadly engaged with condensed matter research activities at Illinois. Further information about postdoctoral fellowships at ICMT is available from the ICMT website.

Applications are also invited to fill a number of departmental postdoctoral positions in condensed matter theory, which start in August 2013. These positions, which are grant-supported, can be applied for concurrently with the ICMT fellowship.

Although departmental positions are typically more closely tied to a specific supporting project than fellowships, all Illinois postdoctoral researchers are encouraged to take advantage of the extensive opportunities provided to develop breadth through wide-ranging collaborations.

Strong, creative individuals are encouraged to apply for these fellowships and departmental postdoctoral positions, regardless of their specialties. Application deadline: October 29, 2012.

The ICMT website also provides information about ICMT and its aims, which are to foster cutting-edge research in condensed matter theory, very broadly construed, by:

- Providing support for postdoctoral fellows.
- Providing support for graduate students.
- Funding long- and short-term visits by established scientists—experimentalists as well as theorists.
- Hosting and supporting workshops and small conferences.
- Establishing an interactive research environment that encourages members to take on the most challenging long-term research issues.

The University of Illinois is an equal opportunity/affirmative action employer and welcomes applications from minority and women candidates.
