Faculty Position in Condensed Matter Theory  
Department of Physics and Astronomy  
Louisiana State University and A&M College

The Department of Physics and Astronomy at Louisiana State University in Baton Rouge invites applications for an anticipated tenure-track position in condensed matter theory starting in fall, 2007. The condensed matter/materials program at LSU includes theoretical studies of correlated electron systems, nonequilibrium statistical mechanics, and electronic structure, and experimental efforts in materials synthesis and characterization, transport and thermodynamic measurements of correlated electron compounds, as well as on-site photoemission and microscopy studies of surfaces. Preference will be given to candidates with a proven record of research that complements and extends the existing program, although applications in all areas of condensed matter physics will be considered. The opening is at the assistant professor level, however, outstanding candidates may be considered for a more senior position. The successful candidate is expected to establish a vigorous research program and to teach at both undergraduate and graduate levels. Applicants must have a Ph.D. or equivalent degree in physics or a related field. Salary is commensurate with qualifications and experience. Applicants should send a vita and a description of research background and interests, and arrange for at least three letters of reference to be sent to: Roger McNeil, Chairman, Department of Physics and Astronomy, Louisiana State University, Baton Rouge LA 70803-4001 making reference to Log #0784. Applications received by January 5, 2007 will receive full consideration, however, late applications will be considered until a suitable candidate is selected. LSU is an Equal Opportunity/Equal Access Employer. LSU strongly encourages applicants with academic experiences and interests in culturally diverse groups.
