Postdoctoral positions in Materials Theory with Prof. Alex Zunger

The group of Professor Alex Zunger at the University of Colorado Boulder (UCB) has postdoctoral positions available in (1) Theory of semiconductor Nanostructures, including Quantum dots and wires and (2) Design and Discovery of new materials. We offer candidates the opportunity to work in a highly interdisciplinary and exciting environment, interacting with the Energy Frontier Research Center (EFRC) on Inverse Design (http://www.centerforinversedesign.org) as well as with UCB faculty in other areas. Strong background in computational solid-state physics, including first-principles methods, and scientific programming skills are needed. There are no citizenship restrictions. Starting dates are flexible. Applications are being accepted now. Interested applicants should send their curriculum vitae and references to alex.zunger@Colorado.edu.

Alex Zunger
Professor
University of Colorado
Office of the Vice Chancellor for Research
Chief Scientist /Theory
Energy Frontier Research Center on Inverse Design
