

Postdoctoral Research Associate in Theoretical Condensed Matter Physics

The School of Physics and Astronomy at the University of Minnesota invites applications for one research associate position in theoretical condensed matter physics, with a starting date in the spring or fall of 2015. Applicants are expected to have completed their PhD in physics or related areas before the starting date of the position. The successful candidate will work in the research group of **Prof. Rafael Fernandes**, and will be expected to interact with the condensed matter experimental groups as well. Specific research topics include, but are not limited to, unconventional superconductivity, emerging phases, oxide heterostructures, disordered quantum systems, and transport in strongly correlated systems. More information about the group can be found at www.physics.umn.edu/people/rfernand.html

The position is expected to last for up to two years. Please apply online at:

<https://employment.umn.edu/applicants/Central?quickFind=124868> (requisition number **194658**)

The application material consists of a curriculum vitae, a brief research statement, and the names and complete contact information for three references. Please arrange for three letters of reference to be sent by email to **rfernand@umn.edu**. Applications received before December 15, 2014 will receive full consideration.

The University of Minnesota shall provide equal access to and opportunity in its programs, facilities, and employment without regard to race, color, creed, religion, national origin, gender, age, marital status, disability, public assistance status, veteran status, sexual orientation, gender identity, or gender expression.
