Postdoctoral Research Position
in Condensed Matter Theory
at Leiden University

Applications are invited for a postdoctoral position in the quantum condensed matter theory group led by Jan Zaanen. We are looking for an experienced theorist with a mathematical style who will strengthen our effort focussed on quantum statistical aspects of strongly interacting quantum matter. An interest to collaborate with string theorists in employing the AdS/CFT correspondence is appreciated and string theorists having an interest in condensed matter are equally welcome to apply. This position is a full time three year appointment, and for a truly exceptional candidate the position may be promoted to a five year research position with the opportunity to compete for a Dutch VIDI junior faculty grant.

Prospective candidates should send a curriculum vitae and publication list, and an outline of research interests, to:

Ms. Trudy Geurds
Instituut-Lorentz for Theoretical Physics
Leiden University
P.O.B. 9506
NL-2300 RA Leiden
The Netherlands
Or
geurds@lorentz.leidenuniv.nl

Candidates should arrange for letters of recommendation to be sent to the above address by three scientists familiar with their work. Candidates may also wish to include selected preprints or reprints of articles they have written.

Review of applications will begin Februari 15-th 2010 and will continue until a suitable candidate is found.
