The Faculty of Sciences, University of Geneva, Switzerland, has an opening for a position as

Full Professor or Associate Professor
in experimental condensed matter physics
(Professeur ordinaire ou Professeur adjoint)

Responsibilities: Full time appointment comprising at least 6 hours of teaching per week and research activities in the area of condensed matter physics. The Department is looking for a specialist of materials with novel electronic properties. Candidates interested in the synthesis, study, and applications of superconductors and/or other novel quantum materials are especially encouraged to apply.

Degree of requirements: Ph.D. or equivalent
Starting date: October 1st 2007 or as agreed

Applications, including curriculum vitae, a list of publications and a short research plan are to be sent before March 1, 2007 to the

Dean of the Faculty of Sciences
30, quai Ernest-Ansermet
CH-1211 Genève 4
Switzerland

where further information concerning the job description and working conditions may be obtained.

In an effort to involve both men and women in teaching and research, the University encourages applications from women.
