The Department of Physics at the University of Cologne invites applications for two positions of a Lecturer in Physics to be filled in 2007. The initial contracts, with a salary according to BAT Ib/Iia, will run for five years. A conversion into permanent positions (Akademischer Rat A13/14) will be considered.

Starting in Fall 2006, the Physics Departments of the Universities at Cologne and Bonn have set up a Graduate School for Physics and Astronomy, with a novel integrated concept for Master and PhD studies. The candidates for the Lecturer positions should have a distinguished research record in one of the two fields

Experimental Condensed Matter Physics

Theoretical Physics with focus on Condensed Matter or Statistical Physics

and are expected to contribute to the teaching and to the development of teaching concepts within the Graduate School and the Physics Department.

The University of Cologne is an equal opportunity employer, and we actively encourage applications from suitably-qualified women. Women with equivalent qualifications, competence and achievements will be preferentially considered. Also applications from candidates with disabilities with equivalent qualifications will be given preference.

Applications should be sent to: Prof. Dr. A. Krabbe, Vorsitzender der Fachgruppe Physik, Zülpicher Str. 77, D-50937 Köln, Germany. The application deadline is December 1, 2006.
