Postdoctoral Positions in Theoretical Condensed Matter at the University of Wisconsin - Madison

We are expecting an opening for at least one postdoctoral position in theoretical condensed matter physics. We are looking for condensed matter theorists with experience and interest in the areas of strongly correlated electron systems, mesoscopic and nanoscale physics and quantum information. The position is for two years, extendable to a third year if funding permits. Successful candidates are expected to start on September 1, 2007, but earlier arrangements are also possible. Please mail CV and a brief description of your research plan to:

University of Wisconsin
Condensed Matter Group
1150 University Ave
5110 Chamberlin Hall
Madison, WI 53706

or e-mail to cmt07@physics.wisc.edu before February 15.
Please also arrange the letters of references to be sent to the above address.
