

Two post-doc positions in condensed matter theory, Syracuse University

July 16, 2008

The CMT group of Syracuse University invites applications for two post-doc positions beginning January 2009, though the start date is flexible. One post-doc will join the Syracuse group of five faculty members: Mark Bowick, Cristina Marchetti, Alan Middleton, Jen Schwarz and Xiangjun (Sean) Xing, with research interests encompassing correlated percolation, spin glasses, membranes, order and geometry, statistical mechanics and computational complexity, elasticity and plasticity theory, biological physics and jamming. For details see physics.syr.edu/research/condensed_matter/. The second post-doc will join an international collaboration between Cristina Marchetti, Tannie Liverpool (Bristol, UK) and Kristian Müller-Nedebock (Stellenbosch, South Africa) on active gels and liquids. This position will entail spending substantial time in the UK. Applications with CV, research statement and three letters of reference should be sent (preferably by **Oct. 15**) to: **CMTpostdoc@physics.syr.edu** or **CMT-PostDoc, 201 Physics Building, Syracuse University, Syracuse, NY 13244**. *Syracuse University is an affirmative action/equal opportunity employer committed to excellence through diversity.*
