Postdoctoral Research Associate in Theoretical Condensed Matter Physics

The School of Physics and Astronomy at the University of Minnesota invites applications for one postdoctoral research position in theoretical condensed matter physics, with starting date in the spring or fall of 2013. Applicants are expected to have completed their PhD in physics or related areas before the starting date of the position. The successful candidate will work in the group of Prof. Rafael Fernandes and is expected to interact with experimental groups as well. Specific research topics include, but are not limited to, unconventional superconductivity, emerging phases, disordered quantum systems, and transport in strongly correlated systems. More information about the group can be found at [www.physics.umn.edu/people/rfernand.html](http://www.physics.umn.edu/people/rfernand.html)

The position is expected to last for up to two years. Please apply online at: [https://employment.umn.edu/applicants/Central?quickFind=107284](https://employment.umn.edu/applicants/Central?quickFind=107284) (requisition number 181404)

The application material consists of a curriculum vitae, a brief research statement, and the names and complete contact information for three references. Please arrange for three letters of reference to be sent by email to rfernand@umn.edu. Applications received before December 15, 2012 will receive full consideration.

The University of Minnesota shall provide equal access to and opportunity in its programs, facilities, and employment without regard to race, color, creed, religion, national origin, gender, age, marital status, disability, public assistance status, veteran status, sexual orientation, gender identity, or gender expression.
