Postdoctoral Position in Condensed Matter Theory at Rice University

The Condensed Matter Theory Group at Rice University expects the opening of one or more postdoctoral positions to begin in Fall 2007. The successful candidates will be able to interact with Qimiao Si, Carlos Bolech, Peter Nordlander, other postdocs and graduate students, as well as an active group of experimentalists. The areas of interest include strongly correlated electronic and magnetic systems and mesoscopics. Applicants should send a curriculum vitae including a list of publications, a brief statement of research interests, one or two selected (p)reprints, and arrange for three letters of recommendation to be sent to <bbraun@rice.edu> with subject line “CMT Postdoc Search”, or by postal mail to Prof. Q. Si, c/o Barbara Braun, Dept of Physics and Astronomy - MS61, Rice University, 6100 Main Street, Houston, TX 77005, USA. To ensure full considerations, applications should be complete by mid January 2007. Exceptionally qualified candidates will be nominated for a G. K. Walters Fellowship, which carries a substantial supplement for salary and research support; details can be found on the website <http://www.physics.rice.edu/> under [Open Positions]. Rice University is an EO/AA employer.
