The Rutgers Center for Materials theory (http://cmt.rutgers.edu/Home.html) is seeking the application of interested candidates for postdoctoral research positions in Theoretical Condensed Matter Physics, beginning Fall 2007. Interests of the group span a broad range of topics in many body and condensed matter physics, including:

- strongly correlated electron systems, quantum criticality, ferroelectrics and multi-ferroics, superconductivity of novel materials and nanostructures, disordered systems and mesoscopic physics, non-equilibrium physics, quantum impurities, quantum computation, non perturbative field theory methods, dynamical mean field theory and the first principles calculation of electronic structure.

Interested applicants should send their cv, and a brief description of research interests, and arrange for three letters of reference to be sent by email or regular mail to

Ms Fran DeLucia  
Dept of Physics and Astronomy  
136 Frelinghuysen Road  
Piscataway, NJ 08855  
USA  

fran@physics.rutgers.edu

Decisions on postdoctoral positions will be made after Jan 15th, 2007.
