The Condensed Matter Theory group (Hae-Young Kee, Yong-Baek Kim and Arun Paramekanti) at the University of Toronto anticipates one or more postdoctoral openings starting fall 2007. Our research interests are broadly in the fields of unconventional superconductivity, strongly correlated electron systems, topologically ordered states, frustrated magnetism and atomic gases in optical lattices. The Department also has strong experimental groups in these areas.

Interested candidates may email their applications along with CV, a one-page research proposal, list of publications, and names of referees, to one of us (hykee, ybkim, or arunp, @physics.utoronto.ca). The postdoctoral fellow(s) will be supported by individual members or by the group, depending on the applicant and funding situation.

We hope you can bring this to the attention of any likely candidates in your group/Dept.

Thank you for your help.

Regards,
Hae-Young Kee
Yong-Baek Kim
Arun Paramekanti

Arun Paramekanti,
Assistant Professor,
Department of Physics MP1006,
University of Toronto,
60 St. George Street,
Toronto, Ontario M5S-1A7
Canada.
