Dear Colleague:

I am writing to ask your help in informing your students and postdocs of a postdoctoral position that will be available in my research group in the fall of 2007, with some flexibility in the start date. The postdoc will have the opportunity to work with me and other group members on theoretical studies of charged membranes, cell elasticity, adhesion and self assembly, membrane rafts and other problems in both soft matter physics and biological physics. In addition, he/she can interact independently with the broad range of activities in biological physics and soft matter physics at the Weizmann Institute.

More information can be found on:
